DIRECTOR'S MESSAGE

The Centre for Forensic Behavioural Science and Justice Studies, also known as The Forensic Centre, has demonstrated exceptional productivity and impact over the past year (April 1, 2024 - March 31, 2025). Throughout this period, we experienced a vibrant burst of scholarly activity, successfully advancing our mission through a diverse array of projects, publications, and public engagement. Notably, we completed the first cohort of three postdoctoral fellows, whose contributions exemplify our commitment to fostering advanced research and developing the next generation of scholars in forensic behaviour and justice studies. Our accomplishments are documented in this report, which reflects a comprehensive and impactful portfolio of activities involving all our stakeholders, both internal and external.

One of our flagship events, the Violence and Aggression Symposium, showcased renewal and growth this year. The 2024 edition was notably memorable, drawing a record number of participants—including frontline staff, policymakers, learners, researchers, and Indigenous community representatives. The event featured outstanding presentations by talented faculty and students from the University of Saskatchewan, elevating our regional profile and demonstrating our capacity to generate highcaliber scholarly exchange. This Symposium exemplifies our dedication to fostering dialogue across sectors and fostering collaboration among diverse voices.

Throughout the year, the Centre strategically organized events linked to talent development and career pathways, emphasizing the connection between learning opportunities and employment prospects within correctional services. We strengthened ongoing collaborations with the Research and Implementation Branch (RIB) and the Correctional Service of Canada (CSC), leveraging collective expertise to approach forensic and correctional research with innovation, rigor, and societal impact. These fruitful partnerships culminated in the renewal of \$3 million in funding over the next five to ten years, a testament to the confidence placed in our capacity to produce meaningful research that informs policy and practice.

During this period, the Regional Ethnocultural Advisory Committee (REAC) of CSC visited the Centre, offering valuable insights to guide future research trajectories aligned with community needs. Additionally, we forged new collaborations involving Public Safety Canada, the Saskatoon Fire Department, and the FASD Network of Saskatchewan. These partnerships facilitated a groundbreaking project on the diversion of individuals with mental disorders on Community Treatment Orders, marking a significant step forward in impactful, community-based forensic research. This project was supported through donor contributions aimed at high-impact research initiatives, demonstrating the Centre's commitment to cultivating innovative funding avenues.

Furthermore, we continue working with university advancement units to attract donors passionate about supporting research and training in forensic and correctional fields. The annual report highlights a broad spectrum of research achievements spanning interdisciplinary approaches, community engagement, and applied solutions—that underscore the Centre's wideranging influence. I am immensely proud of our dedicated team, the 'small yet mighty' group (Ms. Samarakoon, Drs. Jewell, Stoliker, Roma and Tetreault) guided by a committed Executive Committee (Drs. Ramsden, Kang, Heavin and Kent-Wilkinson) and Advisory Board (Dr. Bram Noble, Dr. Marek Radomski, Dr. Olajide Adelugba, Dr. Kim Audette, Kathy Neil, Dr. Dena Derkzen, Mr. Eric Michael, Dr. Emily Snyder, Dr. John Weekes). Special thanks go to Prof. Bram Noble for his exemplary leadership as chair of the Advisory Board; we look forward to welcoming new leadership in this vital role.

As I approach the conclusion of my term (potentially my last), I remain steadfast in my commitment to reducing victimization through impactful research. Our aim is to harness our collective expertise, past achievements, and community partnerships to forge a brighter future for Saskatchewan, Canada, and the broader field of forensic research. The Centre's journey over the past year exemplifies our dedication to meaningful progress and societal betterment, and I am eager to see the continued growth and influence of our work in the years to come.

Dr. Mansfield Mela

WHO WE ARE

Advisory Board

- Dr. Bram Noble, (Chair) Vice-Dean Research, Scholarly and Artistic Works, College of Arts and Science
- Dr. Marek Radomski, Vice-Dean Research, College of Medicine
- Dr. Olajide Adelugba, Psychiatrist and Clinical Director, Regional Hospital, Regional Psychiatric Centre (Prairies), Correctional Service Canada
- Dr. Kim Audette, Executive Director, Research and Implementation Branch, Ministry of Corrections, Policing and Public Safety, Government of Saskatchewan
- Kathy Neil, Deputy Commissioner, Indigenous Corrections, NHQ, CSC
- Dr. Dena Derkzen, Senior Research Manager, Research Branch, NHO. CSC
- Mr. Eric Michael, Acting Executive Director, Willow Cree Healing Lodge
- Sgt. Nick Smyth, Manager, Regina Violent Crime Analysis Sections, RCMP F Division
- **Dr. Emily Snyder**, Faculty Member, Department of Indigenous Studies, College of Arts and Science
- Dr. John Weekes, Independent Consultant (previously with CSC)

Executive Committee

- Professor Heather Heavin, College of Law
- Dr. Arlene Kent-Wilkinson, College of Nursing
- Dr. Vivian R. Ramsden, College of Medicine
- Dr. Timothy Kang, College of Arts and Science

Centre Staff

- Dr. Mansfield Mela, Director
- Dr. Lisa Jewell, Research Associate
- Dr. Bryce Stoliker, Researcher Officer
- Dr. Christie Tetreault, Post Doctoral Fellow
- Dr. Renata Roma, Post Doctoral Fellow
- · Lilani Samarakoon, Coordinator
- Arisha Jamil Ahmad, Marketing Assistant

Correctional Service Canada-Prairie Region Ethnocultural Advisory Committee (REAC)

Projects Sponsored by Correctional Service Canada (CSC)

Project	Description	Status
Performance of Cognitive Screening Tools for the Assessment and Diagnosis of Dementia among Older People in Custody	This project constitutes the second phase of a previous study conducted by CFBSJS, which examined the prevalence of dementia and community reintegration needs of older people in custody at the Regional Psychiatric Centre (RPC). The second phase of the study also took place at RPC and sought to enhance the evidence-base for cognitive screening tools used within correctional settings. Specifically, three screening tools were examined in terms of their performance in detecting possible cases of dementia among older persons in custody and, thus, the feasibility of these tools as a pre-screening assessment. Performance was examined based on a formal dementia diagnosis by a Geriatrician. To inform this work, we also conducted a systematic literature review to examine past studies that have investigated cognitive impairment and dementia among older people in custody using cognitive screening tools.	 Data collection and analysis, as well as report writing, was completed in December 2024. Efforts to disseminate project updates/findings through publications and conference presentations are ongoing. At present, the systematic literature review has been published and the manuscript focused on the primary data has been submitted for peer review. Since beginning the second phase of the project, updates and findings have been presented at seven conferences/gatherings.

Projects Sponsored by Correctional Service Canada (CSC)

Project	Description	Status
Supporting Adherence to Medication in Correctional Settings: A Systematic Literature Review	The major focus of this project was to undertake a systematic literature review to identify existing research on the topic of medication diversion and adherence within correctional settings to synthesize findings as it relates to (1) key factors that contribute to the diversion of, and adherence to, prescription medication in correctional facilities and (2) health-centered strategies or interventions that aim to reduce medication diversion and/or support the adherence to prescription medication among correctional populations.	The manuscript has been submitted for peer review and findings are being presented at conference gatherings.

Project	Description	Status
Training Manual for Community Consultative Groups	First Nations who enter into a Community Tripartite Agreement for First Nations policing services in Saskatchewan have the opportunity to establish a Community Consultative Group (CCG). CCGs are comprised of members of the First Nation community and have a mandate to identify and advocate for their community's policing priorities, as well as to promote dialogue and communication between the RCMP and the community. The CFBSJS developed a training manual outlining the various aspects of CCGs to support the training of CCG members in Saskatchewan.	The Training Manual was completed in August 2024.
īkwēskīcik iskwēwak Evaluation	In 2022, the Ministry established a three-year pilot program, known as īkwēskīcik iskwēwak and delivered by Saskatoon Tribal Council, intended to aid in community reintegration and reduce returns to custody for women involved in the criminal justice system by providing access to necessary supports and services at the point of release. The CFBSJS is conducting a multi-year evaluation of the pilot program. In 2023/24, it examined the initial implementation and delivery of īkwēskīcik iskwēwak during its first nine months of operation. In 2024/25,	 The īkwēskīcik iskwēwak Year 1 Evaluation Report was completed on April 11, 2024. A draft īkwēskīcik iskwēwak Year 2 Evaluation Report was completed on March 19, 2025. Evaluation activities are ongoing.

Project	Description	Status
	the Centre explored specific aspects of program delivery during the program's second year of operations from both stakeholders' and relatives' perspectives.	
sîtoskatôwin Evaluation	Ministry and Saskatoon Tribal Council (STC) led to a three-year pilot project	A shortened version of the sîtoskatôwin referral form was developed in November 2024. Evaluation activities are ongoing.
Evaluation of the Implementation of the NE SVOR	In 2018, the Serious Violent Offender Response (SVOR) was expanded to the Northeast (NE; serving the communities of Pelican Narrows, Deschambeault Lake, and Sandy Bay). Due to multiple factors including, but not limited to, geographical location	The NE SVOR evaluation report was completed on May 1, 2025.

Project	Description	Status
	of partner resources and presence of other violence reduction strategies, the NE SVOR required adaptations for implementation. To fully understand how the SVOR has been implemented in the Northeast, the Centre conducted an evaluation examining how and whether the NE SVOR was implemented as intended; whether program delivery has been stable since inception; the NE SVOR's fidelity to the principles, structures, and practices of SVOR; and its ability to reach its intended target population.	
Recruitment and Retention of Correctional Staff	In this project, the Centre is conducting a literature review and consultations with key informants to: (a) identify effective and innovative, modern strategies for recruiting and retaining correctional staff in custodial and community settings; and (b) inform the Ministry how it can increase its ability to recruit and retain correctional staff.	This project was ongoing at the end of the 2024/25 fiscal period.
Continuous Intake Addictions, Life Skills, and Micro- Certification Programs for Remand and Short Sentences	In this project, the Centre is conducting a literature review to: (a) identify and assess the efficacy and structure of continuous intake programs (i.e., programs with "rolling" enrolment) focused on addictions, life skills, and micro-certifications for individuals on remand or short-term custodial sentences; and (b) inform	This project was ongoing at the end of the 2024/25 fiscal period.

Additional Projects Undertaken by the CFBSJS

Project	Description	Status
Profiling SK Homicide Cases	This study examines homicide cases in Saskatchewan over the past 10 years through the Canadian Legal Information Institute (CanLII) database, coding for case, perpetrator, and victim characteristics. The purpose is to identify notable trends across cases during the period examined.	This project was ongoing at the end of the 2024/25 fiscal period.
Outcome Evaluation of the Saskatoon CTO Clinic	The Saskatoon Community Treatment Order (CTO) Clinic was established in September 2022 to support the treatment of individuals with severe mental illness. The Centre is conducting an outcome evaluation of the CTO clinic to determine if the clinic is succeeding in improving patients' health outcomes, reducing health service utilization, and diverting patients from the criminal justice system. As part of this evaluation, the extent to which the CTO clinic has resulted in cost savings to the health care system is also being assessed.	This project was ongoing at the end of the 2024/25 fiscal period.
Evaluation of the FASD Network's Youth Integrated Justice Program	The FASD Network of Saskatchewan has established the federally-funded Youth Integrated Justice Program to improve the outcomes of Indigenous and non-Indigenous youth with Fetal Alcohol Spectrum Disorder (FASD) who are involved in the justice system	 The Youth Integrated Justice Program Year 1 evaluation report was completed on April 30, 2025. The outcome data tracking tool was finalized on April 30, 2025.

Additional Projects Undertaken by the CFBSJS

Project	Description	Status
	by providing individualized case management, wrap-around support, and system navigation services. The Centre is engaged in a multi-year evaluation of the Youth Integrated Justice Program. In the first phase of the evaluation, it examined the initial implementation and delivery of the program and developed an outcome data tracking tool to be used by the program.	Evaluation activities are ongoing.
Data Review and Program Evaluation of the Saskatoon Fire Department's Inadequate Housing Initiative	The CFBSJS was asked to undertake an evaluation of the Saskatoon Fire Department's (SFD) Inadequate Housing Initiative. Since 2016, the SFD has experienced an increase in calls for service involving unhoused people, which led to the development of the Inadequate Housing Initiative in 2021. The initiative has the mandate to manage bylaw compliance for fires and housing structures, as well as connect unhoused persons with necessary social and health services. This project aims to evaluate the Inadequate Housing Initiative, with particular focus on (1) reviewing and analyzing existing program data and data collection practices, and (2) examining program delivery and outcomes.	This project was ongoing at the end of the 2024/25 fiscal period.

Additional Projects Undertaken by the CFBSJS

Project	Description	Status
Trans Rights are Human Rights	This project began with a book chapter that examined Bill C-16 (which added gender identity and expression to the Canadian Human Rights Act and Criminal Code to protect the rights of trans and nonbinary people) in terms of its impacts on policy and practice within Canadian prisons, with critical reflection on previous international research into the experiences of trans and non-binary people in custody. This has led to a primary study within Saskatchewan that aims to gather the perspectives of trans and non-binary people with a history of incarceration, as well as representatives of community-based organizations who work closely with trans and non-binary people with a history of incarceration, to examine the experiences of this group while in custody (and during community	At present, the book chapter has been accepted for publication and is in press and, simultaneously, data collection is underway for the primary study.

Education and Training

Graduate Student Research Awards

The Centre for Forensic Behavioural Science and Justice Studies provides support for University of Saskatchewan graduate students who's academic and/or research interests pertain to the areas of crime, justice, and corrections. Project-specific funding helps student researchers cover the direct cost of research activities.

The Centre for Forensic Behavioural Science and Justice Studies opened the call for graduate student research awards in February 2024, and closed the call in March 2024. One graduate student application was fully funded through this round of funding.

 Ebenezer Barnes, Department of Sociology - Race and Contact at Play: Understanding Blacks Perceptions of Law Enforcement (\$5,000)

Postgraduate Degree Specialization Certificate in Corrections

In collaboration with the Saskatchewan Ministry of Corrections, Policing and Public Safety, the Centre established a Postgraduate Degree Specialization Certificate in Corrections at the University of Saskatchewan in 2012. Targeted to senior managers employed in the field of corrections, this two-year applied training program emphasizes advanced knowledge and professional skill development and evidence-based practice in the areas of offender assessment, case management, clinical supervision, program evaluation and research. Program instruction is shared by Senior Clinical Directors from the Ministry of Corrections, Policing and Public Safety, as Professional Affiliates of the Department of Psychology.

Undergraduate and Graduate Research Training in 2024-2025:

During 2024-25, the Centre continued to contribute to the academic and professional training of USask students by hiring ten graduate students and one undergraduate student from multiple disciplines. The students gained experience with hands-on data collection, analysis and research report writing and contributed to the successful completion of several Centre projects.

The Centre also hired two marketing students to implement knowledge translation activities.

Student Supervision in 2024-2025:

Chinwendu Ikwuegbu completed her Master of Public Health Practicum with the CFBSJS under the supervision of Dr. Bryce Stoliker and Dr. Lisa Jewell. Her project title was "Data Review and Program Evaluation of the Saskatoon Fire Department's (SFD) Inadequate Housing Initiative"

Lingzi Jin completed her Master of Public Health Practicum with the CFBSJS under the supervision of Dr. Bryce Stoliker and Dr. Lisa Jewell on a project focused on medication diversion/adherence within correctional facilities.

Community Engagement

20th Biennial Symposium on Violence & Aggression

The Violence & Aggression Symposium is a biennial conference that has been convening since 1986, bringing together frontline workers, as well as clinicians and other professionals and administrators in criminal justice and forensic mental health. The Symposium translates research and theory into practice and provides an opportunity to highlight excellence and innovation within a variety of correctional and criminal justice environments.

The conference was held on campus from May 26 to 28, 2024. This exclusively in-person event, the first since the pandemic, attracted over 200 participants. The Symposium theme was *Current Trends in Violence* with a focus on four subtopics: gangs, human trafficking, intimate partner violence, and post-COVID trends in violence. It involved 4 keynote sessions, 12 concurrent sessions, and one banquet session with 20+ national and international presenters sharing their insights on these topics. Importantly, the Symposium translated research and theory into practice and provided an opportunity to highlight excellence and innovation within a variety of correctional and criminal justice environments.

You can find out more about the conference here.

Public Forum 2025: Improving the Lives of Mothers in Prison

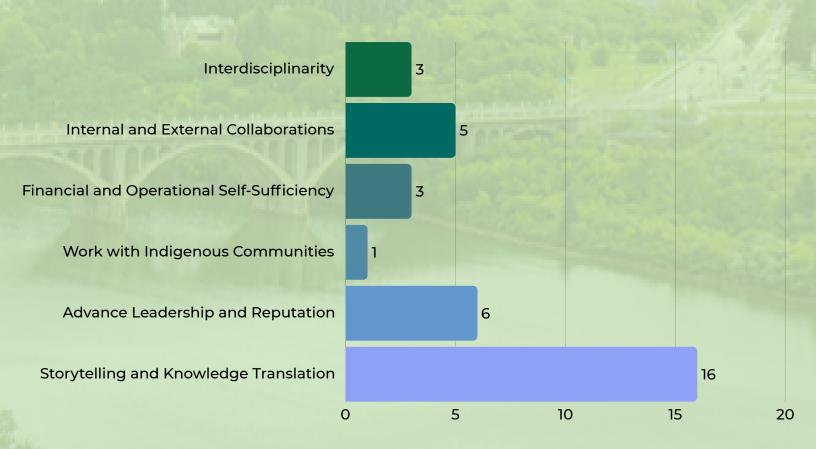

Held on March 20, 2025, this year's Public Forum brought together experts, advocates, and community members to discuss critical issues affecting incarcerated mothers in Canada. The event featured keynote addresses by Dr. Martha Paynter on reproductive health within prison systems and Prof. Robin Hansen on systemic discrimination and the denial of children's rights in incarceration decisions. A panel discussion followed, fostering dialogue on how policy, law, and healthcare can better support mothers in custody and their families.

You can find out more about the public forum here.

OUR IMPACT

The Centre's activities target six goals: Interdisciplinarity, Internal and External Collaborations, Financial and Operational Self-Sufficiency, Work with Indigenous Communities, Advance Leadership and Reputation, and Storytelling and Knowledge Translation. Those goals are achieved by following guideposts that are included under each goal as identified in the Centre's Strategic Plan.

The Centre has developed an impact tracking metrics that tracks Centre activities and categorizes them under matching strategic goals and guideposts from the Centre's Strategic Plan. The following section highlights the Centre activities that were tracked through our metrics.

OUR IMPACT

Interdisciplinarity

 The Centre conducted the study "Predictability of Screening Tools for the Assessment and Diagnosis of Dementia among Older Persons in Custody at the Regional Psychiatric Centre" in collaboration with the College of Nursing.

Internal and External Collaborations

The Centre has expanded its collaborations with external organizations in the last year.

- The Centre is collaborating with the Saskatoon Community Treatment Order (CTO) Clinic of the Saskatchewan Health Authority and conducting an Outcome Evaluation and Cost Analysis.
- The Centre is collaborating with the FASD Network and conducting an Evaluation of the FASD Network's Youth Integrated Justice Program.

Financial and Operational SelfSufficiency

 The Centre received a Research Junction Development Grant to conduct a "Data Review and Program Evaluation of the Saskatoon Fire Department's Inadequate Housing Initiative."

Work with Indigenous Communities

 The Centre has been involved in conducting a developmental evaluation of the sîtoskatôwin" program, which is being funded by the Ministry and delivered by Saskatoon Tribal Council.

Advance Leadership and Reputation

 The Centre conducted a literature review "Supporting Adherence to Medication in Correctional Settings" as part of a study that tries to solve the non-adherence problem at the at the Regional Psychiatric Centre

Storytelling and Knowledge Translation

 The Centre presented "Integrating Traditional Healing Practices into Health Services Delivery" at the 39th Canadian Criminal Justice Association Congress, Banff AB – 2024.

FUNDING

Summary of 2024-25 Revenues and Expenditures

The Centre receives financial support through a 5-year Memorandum of Agreement with the Correctional Service Canada and a 5-year Collaborative Research Agreement with the Saskatchewan Ministry of Corrections, Policing and Public Safety. The Centre receives various amounts of financial and in-kind support through from the Colleges of Arts and Science, Law, Medicine, and Nursing. The following table summarizes Centre revenues and expenditures over the period April 1, 2024, to March 31, 2025.

University of Saskatchewan Centre for Forensic Behavioural Sciences and Justice Studies Statement of Operations and Change in Fund Balance For The Year Ending March 31, 2025

Revenue:	
Government of Canada	120,000
Government of Saskatchewan	162,500
Symposium Registrations & Sponsorships	86,069
Other Sources	(1,000)
College of Law 24-25 Support	10,000
College of Law 25-26 Support	10,000
Total Revenue	387,569
Expenditures:	
Salaries & Benefits	349,199
Contracted Services	5,694
Indirect Costs, Overhead, & Operational	94,353
Travel	12,536
Research Grant & Award Balances Awarded/Paid	20,000
Research Grant & Award Balances Returned	(1,323)
Total Expenditures	480,459
Net Surplus (Deficit)	(92,890)
Balance at March 31, 2024	317,618
Balance at March 31, 2025	224,728
