STUDENT Café

Career Advancement in the Age of AI!

Learn how to use AI effectively and responsibly to develop a job application that showcases your unique skills, experiences, and values in a genuine and professional way.

Who should attend?

- Students (undergraduate and/or graduate) in the Colleges of Art & Science, Law, and Nursing; Johnson Shoyama Graduate School of Public Policy; and School of Public Health
- Anybody with interest or relevant background

Why you should attend?

The presentation by the Ministry of Community Safety will cover:

- Effective strategies for developing job applications
- Best practices and common mistakes when using AI in the job application process
- A live demonstration of how AI can assist with career development and creating job application materials

The Forensic Centre (USask) presentation will cover:

- What we look for in a strong job application
- How to present yourself effectively without overselling your skills and experience
- Developing job application materials that support both obtaining and maintaining employment
- Strategies for improving your job application when you are not getting interview invitations or responses from employers

OCTOBER 20, 2026

ART 256

1:00 PM – 3:30 PM

Presentations by the Ministry of Community Safety and the Forensic Centre will last 1.5 hour followed by a panel discussion (Q/A) & networking

Refreshments will be provided
